Summary

UX designer with a Master’s degree in User Experience and Interactive Media Design, with a particular focus on AI-driven systems and user interaction. Experienced in the entire design process, ranging from user research and analysis to concept development and implementation. Works in a structured yet exploratory manner, with a strong interest in how people interact with complex systems and how design can make them more understandable and usable. Thrives in cross-functional teams and enjoys taking responsibility for driving work forward, from initial idea to finished solution.

Utbildning

Masters degree: User experience and interactive media design

Södertörns University, Stockholm
September 2024 - June 2026
Focus on user research, human-AI interaction, UX design, and complex digital systems.

Bachelors degree: IT, media and design

Södertörns University, Stockholm
September 2018 - June 2021

Language

Native language: Swedish
English
Fluent (C2)

Experiences

- Design & UX**
 - UX-design
 - Interaction design
 - Wireframing & prototyping
 - User flows & information architecture
- AI & Design**
 - Designing AI-powered systems
 - Prompt design och iteration
 - Human-AI interaction
 - AI-supported design workflows
- Research & Analys**
 - User research (interviews, think-aloud studies)
 - Qualitative analysis
 - Insight & concept development
- Tools & Technology**
 - Figma
 - React
 - HTML & CSS
 - Adobe Creative Suite
 - Blender

Relevant UX projects and experience

Scania - Design System & mobile UX February 2021 - June 2021

- UX Designer (Internship and Degree Thesis)*
- Worked on Scania's digital design system alongside design and development teams
 - Contributed to documentation and design principles for the design system
 - Conducted a thesis project on guidelines for mobile applications and design scalability in mobile interfaces
 - Explored how consistent guidelines can improve user experience and development velocity

Master's Thesis – January 2026 - June 2026
Human-AI Co-Coding

- Södertörns University, Stockholm*
- Conducted a qualitative study on how humans collaborate with generative AI systems
 - Planned and executed user studies using observations and think-aloud methodology
 - Analyzed control, decision-making, and human-AI interaction in modern development environments

Karolinska Insitutet - Digital June 2020 - August 2020
Experience for Children in Healthcare

- UX Designer (Project Assignment)*
- Developed concepts and a prototype for a digital game aimed at children facing hospital stays
 - Applied user-centered design to foster a sense of security and understanding
 - Explored how digital experiences can support learning and engagement in healthcare settings

Restaurant Manager April 2023 - September 2024

- DEGLABBET, Stockholm*
- Developed and implemented procedures to improve service quality.
 - Managed daily operations and ensured the restaurant ran smoothly and efficiently.
 - Coordinated staff tasks to optimize customer service and workflow.
 - Oversaw inventory and managed orders to ensure adequate stock levels.

Projektledare March 2022 - September 2022

- Arvered kommunikation, Stockholm*
- Developed creative concepts for brand activations and interactive experiences
 - Designed wireframes, websites, and 3D visualizations for client presentations
 - Managed project execution, including staff planning, travel and accommodation logistics, and on-site implementation
 - Collaborated with external suppliers on the production of brand materials, including print and branded apparel
